

SECURE BODY TEMPERATURE SCREENING TO HELP REDUCE RISKS OF EXPOSURE

Fever is a prime indicator of contagion. Screening visitor and staff temperatures can help keep infection from spreading in your facility.

The welloStationX™ is an automated, FDA-cleared, no-touch clinical thermometer, providing temperature screening, clearance badges, flexible reporting, and alerts to help lower the spread of contagious illness in workplace settings.

SELF-SERVICE, NON-CONTACT TEMPERATURE MONITORING

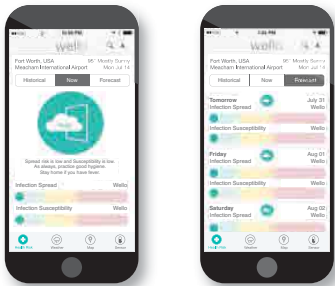

- Clinically tested and FDA-cleared class II product.
- Quickly measures an individual's body temperature as accurately as taking oral temperature.
- Self-adhesive "I'm wello" identification sticker for individuals with temperature below the customizable threshold (default 99.5°F).
- Immediate alerts sent to internal stakeholders when a temperature above the threshold is discovered.
- Optimal for healthcare facilities, senior living centers, manufacturing, government, office buildings, commercial buildings, and education facilities.
- Optional time and attendance feature available.
- Cloud-enabled software for reporting and monitoring, powered by Wello Inc.

welloStationX is also offered in a desktop version.

welloDash™ is a screen, identical to the welloStationX, that allows administrators to monitor and view exactly who is in front of the welloStationX.

The welloWatch™ app provides real-time, geo-specific susceptibility and spread risk updates hourly to your specific location, providing an easier method to predict the spread of infection. It is available for free in the App Store.
