FAZE 3 WALLCOVERING LAUNCH

Canon Solutions America is excited to announce the new Faze 3 line of PVC-free wallcovering products, including Type II certified, Type II, and Metallic Gold and Silver. With this new line, your print face can remain consistent across ProTex™ and EuroLux™ platforms.

These two lines extend from smooth to now textured-embossed faces. Additionally, the EuroLux™ material is offered as paste-to-the-wall, pre-pasted, and RTI (Ready to Install) removable PSA. This provides your customers with a wide variety of finish and installation options across multiple platforms.

These materials are universally compatible across UVgel, UV, Latex, and Eco-solvent platforms.

The new MetalX™ matte metallic gold and silver is an absolute game changer in the wallcovering industry. Whether you're utilizing white ink or CMYK, the 10 mil weight can provide a great structure for paste-to-the-wall applications.

- ProTex™ 18 Mil
- EuroLux™ 9 Mil
- MetalX™ 11 Mil

ProTex™ PVC-free Commercial Wall Cover	ProTex™ is a 100 percent PVC-free, 18-mil, Type II commercial wallcovering. It combines a smooth or soft suede textured, coated, non-woven fabric with a traditional Osnaburg scrim backing to help provide a durable, dimensionally stable, and high strength fabric. ProTex™ is engineered to be printable on either latex, solvent, UV, or UVgel printers. It offers a stable and optimized white print surface for a brilliant canvas for exceptional color fidelity and crisp, clean imaging with a soft, true matte finish. The product is Class A Certified (ASTM-E84).
EuroLux™ PVC-free Type I Wall Cover	EuroLux™ is a 100 percent PVC-free, 9.5-mil, Type I commercial and residential wallcovering. It is a smooth, coated, non-woven fabric made from a blend of polyester and cellulose fiber that's latex saturated to help provide excellent flexibility, dimensional stability, and strength. EuroLux™ is engineered to be printable on latex, solvent, UV, or UVgel printers. It offers a stable and optimized white print surface for a brilliant canvas for exceptional color fidelity and crisp, clean imaging with a soft, true matte finish. The product is Class A Certified (ASTM-E84).

SMART CHANGE STARTS HERE.

EuroLux™ Prepasted (PPD) PVC-free Type I Wall Cover	EuroLux™ PPD is a 9.5-mil Type I prepasted wallcovering. It is a smooth, coated, non-woven fabric made from a blend of polyester and cellulose fiber. It is latex saturated to help provide outstanding flexibility, dimensional stability, and strength, with a water-activated, prepasted back side coating. EuroLux™ is engineered to be printable on either latex, solvent, UV, or UVgel printers. It offers a stable and optimized white print surface that provides a brilliant canvas for exceptional color fidelity and crisp, clean imaging with a soft, true matte finish. The product is Class A Certified (ASTM-E84).
EuroLux™ Ready-to-Install (RTI) Removable PSA Wall Cover	EuroLux™ RTI is a 100 percent PVC-free, 9.5-mil Type I commercial and residential removable PSA-backed wallcovering. It is a smooth, coated, non-woven fabric made from a blend of polyester and cellulose fiber and is latex saturated to help provide outstanding flexibility, dimensional stability, and strength. It also has a water-based PSA backing. EuroLux™ is engineered to be printable on either latex, solvent, UV, or UVgel printers. It offers a stable and optimized white print surface that provides a brilliant canvas for exceptional color fidelity and crisp, clean imaging with a soft, true matte finish. The product is Class A Certified (ASTM-E84).
MetalX™ Metalized Type I Nonwoven Fabric Wallcover	MetalX™ is a soft, lustrous, metalic 11-mil nonwoven fabric wallcover. It combines the organic surface irregularities and durability of metal with the high-strength and dimensionable stability of nonwoven fabric. Available in a gold or silver finish, it provides a truly unique print surface. Its neutral-warm base enables easy installation and invisible seam lines. Whether you choose to butt seam or double cut, MetalX™ is designed to remove the bright white visual seam lines that can negatively impact an elegant installation. MetalX™ is printable on latex, UV, UVgel, or other water-based pigment printers. The product is Class A Certified (ASTM-E84).
