

## welloStationX™

The Only Automated, FDA-cleared,  
Touchless Clinical Thermometer for the Workplace

SMART CHANGE STARTS HERE.

# Supporting successful health and safety programs

## PROMOTE YOUR ORGANIZATION'S SAFETY PROTOCOLS WITH welloStationX

By supplying temperature screening stations, instant badges, and flexible reporting and alerts, the welloStationX helps to reduce the spread of COVID-19 and other contagious illness in the workplace.

Whether you're responsible for an office building, a school, a place of worship, or any other communal setting, you need a solution in place to help actively safeguard your environment. With the welloStationX temperature screening station from Wello Inc., you can support the seamless facilitation of your organization's safety protocols with an automated and integrated temperature screening platform that provides the peace of mind needed to stay productive. Combining intuitive health technology and screening practices, the welloStationX helps to mitigate the risks of contagion across all industries by monitoring the status of any individual who walks through your doors.

### welloStationX's Simple Safety Steps

#### 1. Align

- Self Service
- Non-contact
- Visual Instruction
- Audio Instruction

#### 2. Read

- Three-second Reading
- Visual Data
- Optional Audio Data

#### 3. Identify

- Wellness Badge Issued  
or
- Email alert sent if temperature is over threshold

### A Beacon of Protection

welloStationX's blueprint is straightforward. Since 2014, developer Wello Inc's mission has been focused on reducing the spread of contagious illnesses and setting a new standard for employee health and safety within the workplace. Founder Rik Heller created the welloStationX following a dedicated career of fighting Ebola virus, E. Coli, and other dangerous diseases.

After rigorous clinical trials and an FDA clearance process, Wello introduced its flagship product, the welloStationX, to the marketplace in 2018. The mission, from that point forward, has been crystal clear: to help break the chain of infection and maintain a safe, healthy workplace for all. Alongside its senior medical advisory board, which provides expert guidance to company leadership, Wello's customer success team actively promotes best practices with users to help protect and empower organizations.

# Safe surroundings to protect your workforce

## A Snapshot of welloStationX's Functionality

- Clinically tested and FDA-cleared Class II product.
- Quickly measures an individual's body temperature with infrared technology in three seconds, providing results that are as accurate as oral temperature.
- Self-adhesive "I'm wello" identification sticker for individuals registering a temperature below the set threshold (Default 99.5°F).
- Immediate alerts sent when a temperature above the threshold is discovered.
- Optimal for healthcare facilities, educational institutions, senior living centers, office buildings, and commercial settings.
- Optional time and attendance feature available.
- Cloud-enabled for reporting and monitoring, powered by Wello Inc.

*Quick, touchless  
temperature scans*

*No personnel needed  
to operate*

*Badge printed instantly*

## Rely on welloStationX Wherever, Whenever Work is Done

welloStationX is portable, requires no personnel to operate, and is cloud-enabled for reporting and monitoring.

## The Wello Portal Supplies Premium Control

While your welloStationX temperature screening kiosks scan and collect temperature data, the Wello portal helps you configure the collected information to meet your organization's needs, surfacing data when and where it matters most, while maintaining a high standard of privacy.

Digitizing your records and automating temperature logging supports the protection of your people. The Wello portal processes captured data from the welloStationX and makes it available in real time to help you act promptly.

- Set up alerts for immediate notifications of elevated readings.
- Analyze aggregate data across your locations.
- Track the success of your company-wide protocols.

## Best practices for storing and managing temperature logs

Maintaining the privacy of employee health data is a top priority for many organizations. When it comes to the security of your logs, Wello can help you maintain control by providing the tools needed to stay a step ahead.

- Easily manage logs from all your kiosks in one place.
- Control who has access to the logs, and manage how they are viewed, stored, and deleted.
- Store sensitive health data in Wello's SOC 2-compliant data center.
- Establish data handling policies that abide by applicable HIPAA and privacy policies.

## PROVIDING PEACE OF MIND IN ANY ENVIRONMENT

Safety has never been more essential. No matter where you get work done—whether it's in an office building, a school, a place of worship, or any other shared setting—you need proactive support to safeguard your surroundings.

The welloStationX automated temperature monitoring station supplies the functionality needed to help reduce the risk of exposure to COVID-19 and other infectious diseases.
