

PSCFLM2

Clear Film for Screen Positives Aqueous Inkjet Media

PRODUCT DESCRIPTION

PSCFLM2 is specially designed to create images for screen positives and negatives. This updated coating formula has a lowered DMIN, reduced curl, and improved dot gain. The microporous design provides quick dry-time, and water resistance when using pigment inks. Universal compatibility on Epson®, Canon, and HP® printers.

SPECIFICATIONS

Physical Properties*

- **Caliper:** 4.8 mil
- **DMIN:** (UV) .06
- **DMAX:** > 3.0 with RIP profile

*Target Values

Features

- Quick dry
- Water resistant
- Universal compatibility

Recommended Storage Conditions and Shelf Life

- **Temperature:** 59-86 °F (15-30 °C)
- **Relative Humidity:** 30-70%
- Repack opened rolls when not in use.
- One year at conditions noted above.
- Allow material to stabilize to room conditions 24 hours before use.

Environmental, Health, and Safety

- No Material Safety Data Sheet required.
- Waste not suited for recycling.

Main Applications

Screen positives and negatives.

Printer/Ink Compatibility

Recommended for use in most photographic and display graphics inkjet printers including: Epson® Ultra Chrome and K3 series, Vivid Magenta series, Canon imagePROGRAF serie, as well as Hewlett Packard® Z series and HP5500 series printers. For a complete compatibility chart on our website go to: csa.canon.com

Important

Printer and driver settings need careful setup to ensure the best performance. Appropriate ink loads must be set for the ink/printer combination being used.

Color Profiles

ICC Color profiles help improve image quality and optimize ink limits for improved dry-time, wide color gamut, and accurate color matching.

This information is presented as a general guide and is not a performance guarantee. The user should determine prior to use the suitability of the material for the specific application or purpose.
