PHP7G

7 mil Glossy Photo paper for Aqueous Inkjet Media for use with dye and pigment ink on thermal and piezo inkjet printers.

PRODUCT DESCRIPTION

PHP7G is a 7 mil Glossy resin coated photo paper designed for thermal and piezo aqueous inkjet printers. Excellent image quality and instant dry coating allows for exceptional detail on prints. High gloss surface makes it excellent for showing high quality details in the images. PHP7G is also compatible with the ColorWave 9XX printers.

SPECIFICATIONS

Physical Properties*

- **Basis Weight:** 180 gsm
- **Caliper:** 7 mil
- **Opacity:** 90%
- **Whiteness:** 85 CIE
- **Gloss Level:** 90 @60
Target Values

Features

- High gloss finish
- Instant Dry
- Cross Platform Compatible

Recommended Storage Conditions and Shelf Life

- **Temperature:** 60-86 °F (10-30 °C).
- Store in original packaging and plastic bag. Best stored in cool, dry area.
- Storage 50% relative humidity and temperature range 70 °F
- Repack opened rolls when not in use.
- Up to one year at conditions noted above.
- Allow material to stabilize to room conditions 24 hours before use.

Environmental, Health, and Safety

- No Material Safety Data Sheet required.
- Waste not suited for recycling.

Main Applications

- Indoor Posters
- Trade Show Signage
- Traditional Photographs

Printer/Ink Compatibility

PHP7G is recommended for use in the aqueous pigment and dye printers by Canon, HP, and Epson. See profiles for printer settings. Can also be used in the ColorWave 9XX printers.

Media Handling

To avoid smudges and marks on your finished print we recommend handling the coated surface while wearing cotton gloves. Store unused media in original packaging, vertically. For best results let media acclimate to printing room conditions for 48 hours before use.

Important

Printer and driver settings need set up to help ensure the best performance. Appropriate ink loads must be set for the ink/printer combination being used.

ICC Color Profiles

ICC color profiles can improve image quality and optimize ink limits for improved dry time, wider color gamut, and accurate color matching.

Lamination

PHP7G glossy photo paper can be thermal or pressure sensitive laminated. Although we recommend pressure sensitive for best results, you can use low melt thermal laminates as well for applications that require that encapsulated product.

This information is presented as a general guide and is not a performance guarantee. The user should independently determine prior to use the suitability of the material for the specific purpose.

SMART CHANGE STARTS HERE.
