#### Environmental, Health & Safety

- No Material Safety Data Sheet required.
- Waste not suited for recycling.

#### Main Applications

- Short term indoor and outdoor banners
- Trade Show displays rollable banner stands

#### Printer/Ink Compatibility

Recommended for use in Océ ColorWave 500/650/700 series printers. On the Océ ColorWave 500/700 printing system you should choose the Océ 7SB 7 mil Soft Banner profile. Remember to perform the media calibration function on the Océ ColorWave 500 and 700 printers. On the Océ ColorWave 650 printer you need to download the 7SB Océ Media profile from the CSA website.

#### Media Handling

To avoid smudges and marks on your finished print we recommend handling the coated surface while wearing cotton gloves. Store unused media in original packaging, vertically. For best results let media acclimate to printing room conditions for 48 hours before use.

#### Important

Printer and driver setting need set up to ensure the best performance. Appropriate ink loads must be set for the ink/printer combination being used.

#### Color Profiles

ICC color profiles will improve image quality and optimize ink limits for improved drytime, wider color gamut, and more accurate color matching. In the Océ ColorWave 500/650/700 series printers can use the Océ 7SB Profile
