

## ROBUST, MULTILAYERED, TAILORED SECURITY

Help keep sensitive faculty and student information secure throughout your education institution: from printer and document access to safeguarding pre-printed forms

Securing sensitive information is a primary concern for almost every type of business and organization today—especially education. Higher Education institutions have a particular responsibility and obligation to protect and secure sensitive student financial aid information, personally identifiable information (PII), and protected health information (PHI).

With potential risks everywhere, both external and internal, education institutions want tools to help protect their data. The innovative features and easy-to-use functions of the third generation imageRUNNER ADVANCE Series can help reduce the risk of information leaks and enhance overall security with multilayered security solutions to help safeguard sensitive data.\*

## CONTROL ACCESS

Canon Solutions America offers device authentication options for colleges and universities of every size, so you can easily enable or restrict user access to critical features and functionality through authentication and user credentials that are based on the user's role and their need to know.

You control who is authorized to access multifunction devices and desktop printers to print, copy, scan, or send documents such as faculty evaluation reports, student grade records, and student progress reports. Authentication and access control options include proximity cards or password-based systems.

## DOCUMENT MANAGEMENT

Student health records and other sensitive information left on output trays pose potential security risks. Canon Solutions America provides driver-based, server-less, and server-based solutions, such as Secured Print and uniFLOW Secure Print, to help safeguard printed documents. These solutions make it easy to configure your Canon multifunction printers to require user authentication before any document can be printed and retrieved.

Canon multifunction printers can also be configured to have incoming faxes routed to a password-protected Advanced Box, network folder, or email to further help safeguard confidential documents.

## SECURE PRE-PRINTED FORMS

At the printer, locking paper trays can help to deter the removal or theft of pre-printed forms, such as pre-printed test forms, professor performance surveys, and HIPAA compliancy forms.\*

Locking paper trays also help eliminate the need to change the paper or manually feed these forms each time you need to print, which can help enhance day-to-day productivity.

## PAPER CASSETTE LOCKS ARE AVAILABLE FOR THE FOLLOWING IMAGERUNNER ADVANCE SERIES:

*imageRUNNER ADVANCE C5500i/C5500i II Series*

*imageRUNNER ADVANCE 6500i/6500i II Series*
