

ROBUST CONTINUOUS FEED PRINTING FOR HIGH PRODUCTIVITY AND QUALITY

VarioStream 4000 series

SMART CHANGE STARTS HERE.

ROBUST CONTINUOUS FEED PRINTING FOR HIGH PRODUCTIVITY AND QUALITY

The VarioStream 4000 series is a highly flexible continuous feed monochrome printing system that offers high quality and productivity for heavy production environments, easy intuitive operation, and seamless workflow integration.

Speeds from 88 to 292 ft/min, 190-1272 letter/min

Print width up to 18.25" (463.5 mm)

35 - 160 gsm media

13-41 million letter/monthly duty cycle

Simplex, Duplex, and Dual Simplex configurations

Quick Change Developer Station technology

Seamlessly integrates into color workflows

Intuitive user-friendly touchscreen operation

Easily upgradeable

Excellent print quality for modern workflows

The SRA controller in the VarioStream 4000 series is built from the same technology as Canon color inkjet printers, so it fits seamlessly into color workflows. Both color and black-and-white documents print beautifully with 256 shades of gray and better solids than other systems. Plus, if your workflow demands PDF printing, the embedded genuine Adobe PDF Print Engine helps to deliver optimal print quality.

Flexibility for today's changing environments

The VarioStream 4000 series offers unparalleled flexibility to meet changing application requirements. Print simplex jobs, duplex jobs, or even two simplex jobs at the same time and effortlessly switch between production and graphic print quality or change to a MICR printing system thanks to the Quick Change Developer Stations (QCDS).

Pre- and post-processing

with easy connection to a wide range of inline finishing systems via industry-standard Type 1 interface.

Conventional Printers VarioStream 4000

Enhanced print quality

in pinless transport configurations with precise toner placement via transfer roller system.

Powerful SRA controller

is AFP/IPDS IS/3-compliant, delivers 256 shades of grey and utilizes the genuine Adobe PDF Print Engine.

Confidently printing your most important jobs

The VarioStream 4000 series supports the latest advances in AFP/IPDS IS/3. Whether you need to print in English or other world languages with unique glyphs, the support of Unicode Complex Text expands your document possibilities. Plus, if you need the latest barcodes and 2D codes, such as GS1-Databar and Royal Mail Mailmark, the VarioStream 4000 series is ready for you.

Investment protection for the unpredictable future

The VarioStream 4000 series system can be easily upgraded in the future to meet your changing print requirements, protect your investment, and give you peace of mind. You can upgrade from simplex to duplex printing, increase productivity from 88 feet/minute to 292 feet/minute, and enhance print quality by adding premium toner.

Intuitive touchscreen operation

A large touchscreen control panel makes operation easy, minimizing job set-up times, and boosting overall productivity.

Absolute data integrity
ensures data on the front and back of the document always match.

Quick Change Developer System
for easy switching between standard, premium, and MICR toners.

Pinless or pinfed
transport systems to support stocks with or without tractor feed holes.

Full Upgradeability
allows you to switch from simplex to duplex, improve print speed, or add toners.

Proven toner technology combined with the newest controller technology

The VarioStream 4000 series gives enterprises everywhere a modern, flexible family of continuous feed digital presses that have the ability to measure up to any application challenge. The series is backed by Canon's 35-year track record as an innovator and creator of state-of-the-art solutions in transactional printing and print on demand.

Combining established standards and the newest controller technology, the VarioStream 4000 series is a product in the best Canon tradition – offering robust flexibility. Engineered for heavy-duty professional operations, the VarioStream 4000 series is built from the ground up with powerful and reliable components to help ensure a long service life with high-quality production.

Seamless workflow integration

Drawing on decades of experience in high-speed variable data controller development, the state-of-the-art SRA controller supports the latest advances in AFP/IPDS printing with full IS/3 support. It also supports additional data streams in connection with the PRISMA production workflow suite, such as PDF/VT, PCL 6, LCDS, VIPP, PPML, as well as host connectivity including IBM z/OS. It is supported by the powerful PRISMA workflow suite, which supports effective, reliable workflow management from prepress to finishing.

For a complete end-to-end solution, Canon Professional Services provide business process and print consulting, supporting a smooth and seamless integration into your business, while enabling applications for future growth.
