OCÉ 10DF

10 mil Blockout Display Film water resistant, Aqueous Inkjet Media for use with dye and pigment ink on thermal, piezo and latex inkjet printers.

Product Description
A 10 mil 100% synthetic blockout film coated for aqueous inkjet. Water resistant, blockout and no curl features make this a great choice for rollable displays, POP, indoor banners, transportation ads. Excellent image quality on multiple ink platforms—aqueous inket, latex, Océ ColorWave® 500/700/650 and 910 printers. The Océ 10DF is approved to for use in the Océ ColorWave 500/650/700 printers.

SPECIFICATIONS
Physical properties*
• Basis Weight - 235 gsm
• Caliper - 10 mil
• Opacity - 99%
• Brightness - >85 CIE
*Target Values

Features
• Printable PET Banner
• Excellent image quality
• Water resistant
• Cross platform compatible
• No curl
• Quick-dry semi matte finish

Recommended Storage Conditions and Shelf Life
• Store in original packaging and plastic bag. Best stored in cool dry area.
• Temperature 50°-86°F. (10°-30°C).
• Storage Humidity Range 20% non-condensing.
• Repack opened rolls when not in use

• One year at conditions noted above
• Allow material to stabilize to room conditions 24 hours before use.

Environmental, Health & Safety
• No Material Safety Data Sheet required.
• Waste is not suited for recycling.

Main Applications
• Roll-up Displays
• POP Graphics
• Indoor Banners
• Bus and subway advertising

Printer/Ink Compatibility
Océ 10DF is recommended for use in the aqueous pigment and dye and Latex printers. Remember to perform the media calibration function on the Océ ColorWave 500 and 700 printers. For the Océ ColorWave printers you will need to download the media profile from the www.csa.com/support section of the website.

Media Handling
To avoid smudges and marks on your finished print we recommend handling the coated surface while wearing cotton gloves. Store unused media in original packaging, vertically. For best results, let media acclimate to printing room conditions for 48 hours before use.

Finishing Recommendations
Lamination is not required for Océ 10DF. However it does accept most pressure-sensitive and low-temperature hot laminating materials. Laminates with UV inhibitors help reduce fade and increase print durability.

up to ensure the best performance. Appropriate ink loads must be set for the ink/printer combination being used.

**ICC Color Profiles**

ICC color profiles will improve image quality and optimize ink limits for improved dry time, wider color gamut, and more accurate color matching. You can use at polypropylene printer driver for media choice if you do not have an outside supporting RIP; i.e. Onyx, Caldera, where you can make a custom ICC profile. The Océ ColorWave 650/500/700 Printers can use Océ 10DF profile.

This information is presented as a general guide and is not a performance guarantee. The user should independently determine prior to use the suitability of the material for the specific purpose.
